

**SYSTEM AND METHODS FOR TRACKING
CENTRAL OFFICE EQUIPMENT AND INVENTORY RECORDS**

ABSTRACT OF THE DISCLOSURE

A system and methods for tracking central office equipment and inventory records comprised of a series of modules to provide access to link drawings, racks and equipment across an entire network infrastructure. The system and methods provide a user the ability to view equipment, group equipment, and search for equipment and available rack space. Additionally, the central office equipment and inventory records can be compiled into reports for engineering, planning and analysis.
